React + Redux, Rails, Middleman, HTML5/CSS3/JavaScript, Postgresql

Technical Projects

A Junior Dev / <https://ajuniordev.herokuapp.com/> / [Github](#)

A job board for employers to connect with junior dev job seekers

- Created Backend API with Rails using Postgresql as database.
- Implemented a search bar, created from scratch that enables users to search for jobs in real time.
- Employed pure CSS utilizing React + Redux to create beautiful UI/UX.

WhereTo / [Github](#)

A beautiful Yelp Search Client to help you discover new restaurants, bars, scenery, etc.

- Developed front-end using React + Redux.
- Utilized Yelp Fusion API for search results on a Nodejs backend.

Experience

WeWork / Technical Coach

Nov 2017 - Present, Remote

Fiduty / Frontend ReactJs Developer

May 2017 - Aug 2017, New York, NY

- Developed UI/UX frontend from scratch using React + Redux framework at an emerging FinTech company.
- Built entire user interface including, user profile & home feed, group investing and bank balances.
- Implemented real-time group messaging system using npm actioncables package.
- Developed through using agile methodologies.

Microsoft / Service Advisor

May 2015 - Jan 2016, New York, NY

- Provided service excellence to customers in troubleshooting and resolving computer problems related to Microsoft software and products, and assisted in the technical launch of the first Flagship store in New York City.
- Resolved 25-35 hot fixes a day and 15 -20 extensive troubleshooting requests a day in a high-volume retail location.
- Taught and mentored customers one-on-one in usage of technical products, and led educational presentations.

Civic Leadership Academy / After School Robotics Instructor

Sept 2013 - Jan 2015, Queens, NY

- Developed and taught an Engineering curriculum to introduce 20-25 students in grades 11-12 through the use of Arduino Microcontrollers; students were paired to have their own working robot within 30 days.
- Introduced C/C++ Programming to students 1month prior to robotics building.

Research Foundation of CUNY / Computer Technician

Sept 2011 - Jan 2015, Queens, NY

- Troubleshoot all hardware/software computer issues in school building (2 floors with 100 computers total).
- Received consistently high commendations, leading to second position as an After School Robotics Instructor.
